

SF6 Cylinder Buy Back

This Program Is Designed For:

Any company engaged in using SF6, including utilities, particle accelerators, research companies, defense firms, commercial switchgear or SF6 insulated transformers.

Benefits of the Program:

- Cost management through inventory control.
- Customers can send Polar Technology any cylinder.
- Polar provides valves for every cylinder.
- No hassle valve assessment.
- Credit provided for all SF6 gas in cylinders.
- Polar provides all documentation.
- Free Freight.

Overview & Features:

- Polar Technology accepts all types of cylinders including those from foreign countries.
- Bills of lading, order confirmation and necessary logistics are provided.
- Packing material supplied upon request.
- Cylinder exchanges available. Send us any cylinder and receive a fresh clean cylinder in any size.

How the Program Works:

- Contact Polar/AKT with the number of cylinders to be returned.
- Cylinders must be empty for this price to be effective.
- Polar Technology's customer resource representatives will select a freight carrier.
- You will receive a faxed bill of lading and MSDS sheet.
- Contact the trucking company to ship freight "collect" to Polar Technology.
- Cylinders are received and a check is sent to you within 30 days.
- Cylinders are purchased "as is." It is not necessary for the cylinders to be in certification or have working valves.

Compliance:

- EPA
- DOT
- ASTM 2472
- DOE
- TRI

Notes:

- Environmental impact analysis provided for each cylinder.
- DOT certified specialists on staff to answer questions and address concerns.
