

SF6 Field Recovery

This Program Is Designed For:

- OEM, such as Carrier, McQuay, York and Trane as well as non-OEM centrifugal chiller, commercial refrigeration and air conditioning companies.
- Mechanical contractors.
- A/C contractors.
- Any and all facilities with an in-house chiller management program such as universities, hospitals, pharmaceuticals, industrials, etc.

Benefits of the Program:

- Will allow customer more time to perform repairs.
- Free up technicians to do other things or jobs.
- Maintain cost.
- Minimal downtime.
- Dispatch in most cases in 24 to 48 hours.
- Assist in retro fitting and flushing chiller of all contaminants.
- On-site testing.
- High Yield Guarantee.

Overview & Features:

- Polar Technology is environmentally compliant.
- High speed recovery rates, with portable carts and trailer mounted recovery/reclaim equipment.
- Over 8 years of field recovery experience.
- We can dispatch a trained, qualified and certified team anywhere in the United States.
- We provide removal and recharging of all refrigerants.
- All high and low pressure refrigerant removal.
- Provide gas reprocessing on-site and off-site.
- We provide all cylinders and tanks.
- Dehydration of your system.
- We assist in removal of non-condensable oil and acid.
- Low pressure chiller and leak testing provided.

ECOTECH
RESPONSIBLE RECOVERY.

SF6 Field Recovery

How The Program Works:

Step 1:

- Notify Polar Technology of the system being recovered.
- Customer project specialist will perform a brief needs analysis.

Step 2:

- Polar Technology will work with customers to:
 - Choose proper equipment size
 - Select hoses
 - Determine cylinder requirements

Step 3:

- Agreements and insurance binders are shared.
- Equipment is delivered to customer.
- Customer notifies Polar of job completion.
- Rental costs will stop (if applicable).
- Polar Technology will arrange pick up.

Compliance:

- EPA
- DOT
- ASTM 2472
- TRI
- DOE
