

SF6 Cylinder Refurbishment

This Program Is Designed For:

Companies who have ownership of cylinders and:

- Want to avoid paying demurrage charges when buying SF6.
- Have N2, O2 or air cylinders that must be maintained.
- Have a fleet of cylinders that need periodic maintenance.
- Have Dilo gas carts with on-board cylinders.

Benefits of the Program:

- All packaging needs provided.
- No hassle, easy to follow steps.
- Prompt turn-around on services.
- Great pricing.
- Huge inventory.
- Same day shipping available.

Overview & Features:

- New or refurbished cylinders available for exchange.
- Cleanest cylinders anywhere.
- By request, cylinders can be returned with Nitrogen for a small fee.
- All cylinders will be fully filtered:
 - Valves inspected and replaced, if necessary
 - Graffiti removed
 - Valve caps properly fitted
 - Painted to industry standard or color of your choice
 - 2KMVP internal cleaning process
 - Hydro and visual testing
 - DOT compliance

How the Program Works:

Step 1:

- Send cylinders to Polar Technology.

Step 2:

- Polar Technology will ship you similar cleaned and ready to go cylinders, **or**
- Polar Technology will clean and process your cylinders for DOT compliance and return them to you.

Compliance:

- EPA
- DOT
- ASTM 2472
- DOE
- TRI

Notes:

- **Cylinder refurbishment is a free service we provide to customers purchasing SF6.**
- **Per DOT:**
 - **Cylinder must be tested periodically.**
 - **Cylinder can be shipped to Polar if out-of-date, but they cannot be filled until tested.**
 - **Cylinder must be tested if used in acid environment.**
 - **Cylinder cannot be returned to services if out-of-date.**
